COVID19BE OPEN DATA CHANGES IN REPORTING

COVID19BE_CASES

Date	Change in definition
11/03/2020	Modification of screening policy: only cases requiring hospitalization, and healthcare professionals with fever are tested
28/03/2020	Receipt of retrospective data from a new laboratory performing COVID-19 tests; this led to an increase in reported cases in Wallonia.
28/03/2020	Modification of screening policy: the first cases (up to a maximum of 5 cases) of a cluster in a residential group, which meet the case definition, are now also tested.

COVID19BE_HOSP

Date	Change in definition
28/04/2020	Given the enlarged test indications since 22/04/2020 (all patients admitted to the hospital can be tested, regardless of the reason for admission) and given the gradual return to normal hospital activities, the new lab-confirmed admissions are now subdivided according to pathology, i.e. COVID-19 lab-confirmed patients admitted to the hospital because of COVID-19, and COVID-19 lab-confirmed patients admitted to the hospital because of another pathology but who tested positive within a screening context. The latter are not included in the variable NEW_IN.

COVID19BE_MORT

Date	Change in definition
24/03/2020	Mortality statistics provided by the regional authorities are now complemented with mortality statistics provided directly by the hospitals; doubles are removed.
31/03/2020	Inclusion of both confirmed and suspected COVID-19 deaths.
